Demonstrations

LG Electronics

The session will examine how future connectivity technologies, including 5G Advanced and 6G, will enable the next generation of connected and automated mobility services. Industry experts will discuss evolving connectivity requirements, key technological enablers, deployment timelines and the regulatory considerations needed to support future automotive innovation.

Demonstrations

Wayties (LIG Accuver Consortium)

Wayties develops V2X systems and test solutions for cooperative automated driving and C-ITS, including test equipment, field tests, analytics and engineering.
